EDUCATION WITHOUT BORDERS

WHY UAS?

1. Academic Excellence

UAS provides a challenging university preparatory program. All students are expected to meet rigorous, world-class academic standards and to pursue the International Baccalaureate (IB) Diploma. Our academic program prepares students for success in college. UAS graduates have been admitted to some of the world's finest colleges and universities, including:

Arizona State University	University of Miami
Boston University	University of Colorado
Brown University	University of Michigan
Erasmus University Rotterdam	University of Texas, Austin
Georgetown University	University of Toronto
King's College, London	University of Virginia
McGill University	Westminster University
New York University	École Hôtelière de Lausanne
Northeastern University	Les Roches, Switzerland
Northwestern University	University Groningen, Netherlands
Penn State University	Universidad Católica Argentina
Purdue University	Universidad Católica Uruguay
The New School	Universidad de Montevideo
University of Edinburgh	Universidad de la República (UdelaR)
University of British Columbia	Universidad ORT
Johns Hopkins University	

UAS offers college readiness assessments and university admissions exams. We are the only approved SAT and ACT test administration site in Uruguay. Our college counselor assists students applying to U.S., Uruguayan and other international universities.

2. English Language Program

UAS provides an English-language educational program based on a North American educational philosophy. All classes are taught in English, except Spanish language courses and those that are part of the Uruguayan Program. UAS teachers are either native English-speakers or fully bilingual English and Spanish speakers. Our English immersion approach ensures a rapid and profound acquisition of the language. Language acquisition specialists also provide additional support for English language learners.

3. Individualized Attention

UAS is committed to maintaining small class sizes and an ideal student/teacher ratio. Our teachers know their students as learners and as individuals. They are able to tailor instruction to meet students' needs and learning styles. UAS also has learning specialists and counselors to support students' learning needs.

4. Multicultural Learning Environment

UAS is an international school with students representing more than 35 nationalities. The teaching faculty is composed of certified international educators from the United States, Uruguay, and 10 other countries. At UAS differences in culture, religion, nationality, language, physical ability and appearance are embraced and celebrated.

5. Development of the Whole Child

At UAS we believe that a superior education develops students' academic, physical, social, emotional, and artistic potential. UAS offers arts and technology electives, character education lessons, an outdoor education program and numerous local community service projects. In addition, our counselors work with students, parents, teachers, and administrators to ensure the optimal development of every student's academic, personal and social potential.

6. Three Diplomas

UAS is fully accredited by the New England Association of Schools and Colleges, the Uruguayan Ministry of Education's Secondary School Education Council (ANEP-CODICEN) and Primary School Education Council (ANEP-CEIP), and the International Baccalaureate (IB) Diploma Programme. UAS students can earn up to three diplomas: a U.S. high school diploma, a Uruguayan high school diploma, and an IB diploma.

7. Technology

UAS prepares our students for their future. For this reason we infuse technology into classroom instruction from Early Childhood through High School. Students master Mac and Windows platforms on tablets, laptops, and desktop computers. Using the Google Applications for Education suite, UAS students learn to work efficiently and collaboratively online. Through coding and programming units of study and robotics, students learn to create and innovate with technology.

8. Northern Hemisphere School Calendar

The UAS school year follows a northern hemisphere calendar with classes beginning in August and ending in June. Our calendar aligns with other international schools around the world and with universities in the northern hemisphere.

9. After School Activities and Athletics Program

Outside the classroom, all UAS students are encouraged to develop a skill, hobby or passion through one of the numerous after school athletics and activities options available to Elementary and Secondary students. Students can choose to join Karate, Model United Nations, Robotics, TEEd Club and many more activities. Secondary students may join UAS's swimming, volleyball, basketball and/or soccer teams. As a member of the South American Activities Conference (SAAC), UAS teams travel to compete against other international schools. UAS art students also travel to participate in an international arts festival.

10. First-Rate Facilities

UAS's campus and facilities create the ideal learning environment where students can thrive. The school is situated on three well-maintained hectares in a residential suburb of Montevideo. The 7,100 square meter building has fully equipped science laboratories, purpose-built art rooms with kilns, an auditorium, a large, colorful, and naturally-lit flexible learning space and a gymnasium with a complete weight room. Outside there is an impeccably manicured soccer field, a basketball court, and three playground areas.
